

## LEED® PRODUCT VERIFICATION

This document, produced by a third party, verifies that FLEXMAR Coatings, Inc. products help projects earn credits for the LEED for New Construction, Healthcare, Homes, Commercial Interiors, and Core and Shell rating systems.

The chart below describes the applicable credits.

LEED Credit Name	LEED Points
Low Emitting Materials – Paints and Coatings	1
Regional Materials	1

According to the U.S. Green Building Council Building Design & Construction Manual, the intent of the Low Emitting Materials credit is to "reduce the amount of indoor pollutants that are noxious to construction crews and building occupants". FLEXMAR products contain zero-VOCs and thus meet the green criteria designated by the U.S. Green Building Council, Green Building Certification Institute, and the South Coast Air Quality Management District. This means that when you use FLEXMAR products for your project, you can count on them qualifying for this LEED credit. Use of FLEXMAR products also makes for a non-toxic, safe, and high quality indoor air environment.

Further, these products are manufactured in Brackenridge, PA. Projects within 500 miles of Brackenridge, PA can use the value of this material toward compliance with the "Regional Materials" credit within the same rating systems.

This product has been reviewed by a third party LEED Accredited Professional. If you have any inquiries about how this product helps LEED projects then please feel free to contact us using the information below.

Sincerely,

A handwritten signature in black ink, appearing to be "VB".
